Note:

Matching Credit Memos and Prepayments

If a customer has previously made an on-account payment (a prepayment), or had a credit memo that did not have an "apply-to" invoice when the credit memo was issued, you can match these to specific invoices or debit memos using Cash Receipts Entry.

Enter the customer code as usual. Since you won't actually have a new check, enter anything for the reference (i.e.: MATCH) and \$0.00 for the check amount. Enter the first credit memo or prepayment you wish to apply to one or more invoices by entering the credit memo or prepayment number as follows:

Credit Memo: 12345-CM
Prepayment: 67890-PP

Enter the amount of the credit memo or prepayment that you wish to apply as a negative number in the **Applied Here** field (i.e.: -100.00). You may do this for as many credit memos and/or prepayments as required. Then enter the invoice or debit memo to apply this to as follows:

Invoice: 12345
Debit Memo: 12345-DM

Enter the applicable amount in the **Applied Here** field or press **Enter** to accept the amount displayed. Repeat for as many invoices as required. This matching process may occur in a batch by itself or as part of a regular deposit.

Exit the Screen

When you are finished entering cash receipts, press **F4** from the bank code field to return to the Accounts Receivable Main Menu. You should now proceed to the Cash Receipts Journal and Update.

From the Accounts Receivable Main Menu, select **Cash Receipts Journal & Update**.
